Purpose is to enable the participant to experience a specific state of consciousness, mental projection and attitudes, thus being able to elevate and support others to express themselves and manifest their intentions.

It is an experiential process to evoke a balance between intuitive perception, clear analysis of the matter and proper communication that is personally impersonal. Based on The Science of Essence, the core of Kundalini Yoga, the training explores the natural progression of the self in the journey of life as a powerful projected reality.

Applied through a Psychological Intelligence Quantum Approach refines the perception to grasp the cause of any circumstance, and enhance the neutrality of the mind so it can diligently serve the whole psyche to let the Self prevail.

The quantum approach guarantees that small doses of technology, practice, certain attitudes and lifestyle cause exponential consequences favorable to express the uniqueness of the individual.
